WHO AM I

Practicing web development and completed V School web development bootcamp in January of 2022. Striving to have good web standards while starting my tech career. I have had a great interest in the development side and how to implement a great user experience. Always pushing to learn web design, website development, and striving for solutions. Eager to be in the industry so I can expand on the basic foundations that I have learned and gain extensive knowledge from higher level developers.

HOW I CAN ADD VALUE

I am collaborative, dependable and inquisitive in nature. My true passion is mentoring. My areas of expertise include focusing on attention to detail, written and verbal communication skills, and not being afraid to ask questions. I also have experience in leadership roles and the reputation as a dependable person.

My **technical skills** include:

JavaScript | React | HTML | CSS | Node.js | Express | AJAX/HTTP | Mongoose | MongoDB | Git

WHAT I'VE LEARNED

Certification of Web Development, V School
JANUARY 2022 - JULY 2022

Associates in General Studies, Motlow State
Community College
2016-2017

PROJECTS I'VE DONE

Movie API

[GitHub: Movie API](#) | TECHNOLOGIES: **React, CSS, Axios**

- Using Axios to get data from "The Movie Database." Using that data to display on several pages in categories, while letting the user get information displayed for each individual movie. This was the minimum viable product requirements.

Meme Generator

[GitHub: Meme Generator](#) | TECHNOLOGIES: **React, CSS, JSON**

- Created a random Meme Generator that accesses a JSON file to display on the page. Then adding text and posting below. Users are able edit and delete each meme. Met requirements by fetching the data and implementing functionality with useState.

WHERE I'VE BEEN

Teaching Assistant, V School

July 2022 - Present

- Create a meaningful dynamic between myself and the student. Giving them support to not feel discouraged to ask for help.
- Helping 45+ students to utilize the problem solving procedure to think of ways to progress a problem.

Shipping and Receiving Specialist, Kenny Pipe And Supply

June 2020 - June 2021

- Creating positive relationships with customers and vendors. With hundreds of big and small clients, making sure they felt heard, respected and valued every step through the process.
- Performed best practices, became familiar with industry trends, and kept up with industry growth.
- Collaborate with warehouse workers, kept up in a fast paced environment, and maintained communications with both staff and customers.

Abrams Tank System Maintainer U.S. Army

May 2012 - December 2015

- Team lead when NCOs were not present and provided consulting to lower-enlisted peers.
- Repaired and maintained 12 Abram tanks, both mechanical and electrical. Using computer systems and technical manuals to troubleshoot and find the scope of known issues.
